

Worksheet 1.4-1.5

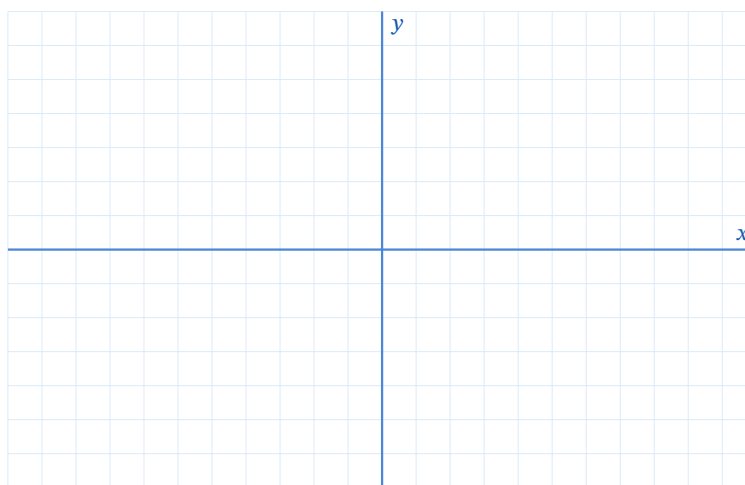

Name: _____

1. Piecewise function.

Let

$$p(x) = \begin{cases} 2x + 1, & x < 0, \\ x^2 - 1, & x \geq 0. \end{cases}$$

- (a) Find $p(-3)$, $p(0)$, and $p(2)$. Show which formula you use for each input.
- (b) Graph p . Use the correct open or closed point at the boundary.
- (c) State the domain, range, x -intercept(s), and y -intercept.

Calculations and conclusions:
