

Worksheet 2.3B-2.4

September 14, 2026

Name: _____

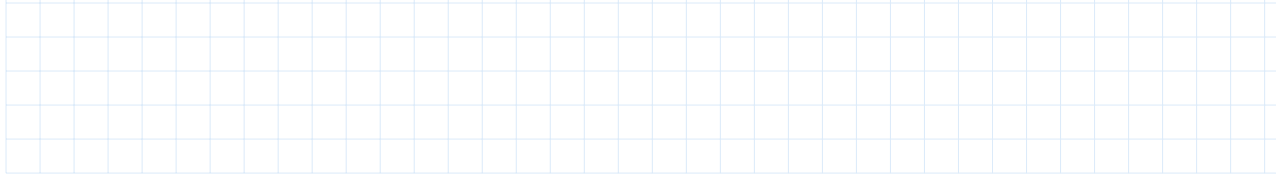

About 10 minutes total. Begin independently, then discuss. Show your work.

1. Quadratic equation and vertex

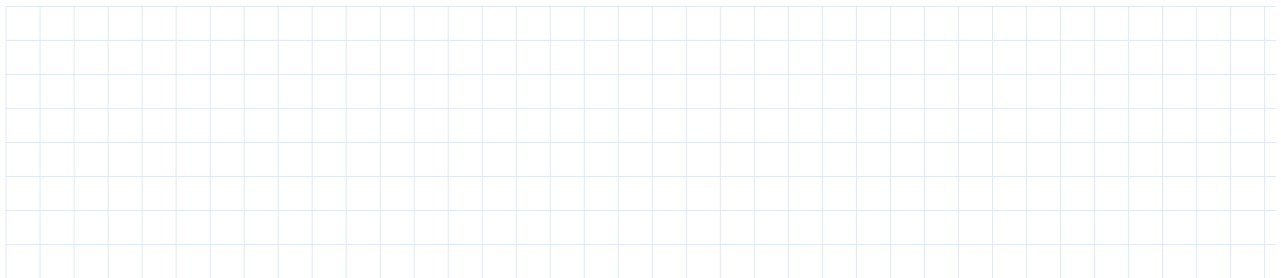

Let

$$f(x) = x^2 - 2x - 3.$$

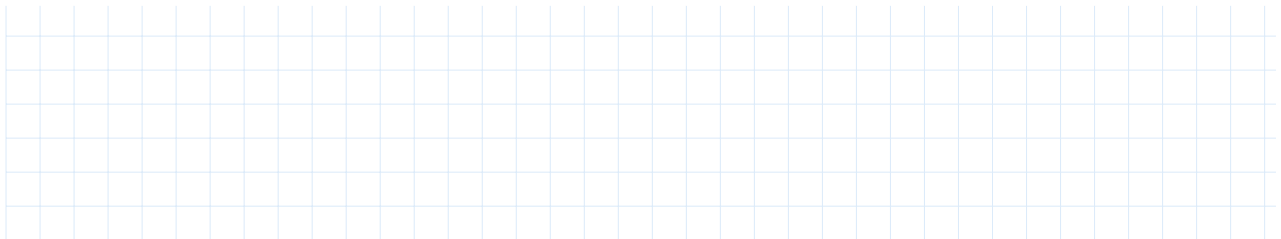

(a) Find the discriminant of $f(x) = 0$. State the number and type of solutions.

(b) Solve $f(x) = 0$ using the quadratic formula.

(c) Find the vertex, axis of symmetry, and range of f .

Worksheet 2.3B-2.4

September 14, 2026

Name: _____

About 10 minutes total. Begin independently, then discuss. Show your work.

2. Quadratic from a vertex

A quadratic has vertex $(-1, -4)$ and passes through $(1, 4)$.

(a) Find its formula in vertex form. Show how you find a .

(b) State whether the function has a maximum or minimum and give that value.
