Quiz 3

Name: _____

Show all work. **Circle your answer.**

Total: 10 points

1. Solve by factoring. **[4 points]**

Solve the equation by factoring. Show the zero-product step and check your solutions.

$$3x^2 + 5x - 2 = 0.$$

Quiz 3

Name: _____

Show all work. **Circle your answer.**

Total: 10 points

2. Solve with the quadratic formula. **[6 points]**

Consider the equation

$$2x^2 - 4x - 3 = 0.$$

(a) Find the discriminant. State the number and type of solutions. [2 points]

(b) Solve using the quadratic formula. Give exact answers. [4 points]
